## INVESTING IN TOMORROW BY ACTING TODAY!

At Unigraph International, we believe in the future and are continuously developing environmentally-friendly solutions. We have been offering innovative solutions that meet the very specific needs of the North American printing industry for more than 25 years. In addition to this expertise that we share with you, we play an active role in trying to find greener solutions. We are constantly working on new ecological products including solvents, fountain solutions, plate cleaners, protective gums, silicone and other specialized products for sheetfed, web and business form presses.

We are firmly committed to protecting our planet. We are reiterating our desire to continue offering the environmentally-friendly solutions the industry deserves.
