

PRODUCT PROFILE

UNI TWO-STEP WASH

A new color wash for rollers & blankets allows you to go from black to yellow in no time!

The world's fastest, finest, most versatile and economical offset press washes. Allows you to go from black to yellow in minutes. Use this after your present wash and watch an amazing amount of ink come off the "clean" rollers.

Prove to yourself that this is a finer two-step wash than any competitive product. Reduce the No. 1 solution with as much as 25% water, and you will still remove more ink than with competitive washes at full strength.

ADVANTAGES

COLOR WASH SYSTEM

Cut wash-up time from dark to light by half and get clean uniform colors from the first sheet.

UNI STEP #1 is a special combination of detergents and solvents that dissolves ink, resin, driers, varnish and gum glaze, while keeping them in suspension. During this longer scrubbing period, the water in **UNI STEP #1** removes gum and fountain solution glaze and flushes the entire suspension down to the wash-up blade for removal (Product code #101).

UNI STEP #2 removes all traces of suspended materials and leaves a fine, protective coating in pores to seal against bleeding and carryover. It is also a fine blanket cleaner and conditioner (Product code #102).

Safety data sheets available upon request
Step #1 code 101 - Step #2 code 102
