

PRODUCT PROFILE

UNI AUTO WASH 2003

Water-miscible wash for automated wash-up systems

UNI AUTO WASH 2003 is a water-miscible wash specifically formulated for presses equipped with automated wash-up systems. It has been designed to clean the most current rollers made either of rubber or synthetic ingredients without harming the covering of the rollers.

UNI AUTO WASH 2003 is a one-step wash that removes dried ink, gum, dirt and lint. It penetrates the glaze left by the different products and deep cleans, quickly evaporating without leaving any kind of residue but rather a smooth, ink receptive surface.

DIRECTIONS

BLANKETS:

Can be used as is or applied on a wet wash-up rag to remove water soluble or solvent soluble glaze as well as blanket piling and lint at the same time.

ROLLERS:

Use at full strength with any automated wash-up attachment or apply manually with a wash-up bottle. **UNI AUTO WASH 2003** can be diluted with water up to 25% in a wash-up bottle.
