

PRODUCT PROFILE

UNI WEB PLUS

Water-miscible wash for web press rollers & blankets

UNI WEB PLUS is a unique blend of solvents, plasticizers, antioxidants and surfactants developed to deep clean in one-step, all contaminants that build up on rollers and blankets of all types of web offset presses.

Its unique formulation removes ink contaminants such as pigments, dryers, varnish and ink resins that prevent good ink transfer. It also removes glaze and deep cleans leaving a smooth and ink-receptive surface. Plasticizers in **UNI WEB PLUS** prevent the rubber rollers from drying out. Frequent application of **UNI WEB PLUS** extends roller and blanket life.

UNI WEB PLUS is even more economical when diluted with 30% water or more. The resulting emulsion becomes a one-step solvent, removing contaminants on rollers and blankets as well as water-soluble glaze caused by gum, etch, lint, and stock coatings.

ADVANTAGES

- High solvency power
- Water-miscible
- Drying speed controlled for offset web presses
- Extended roller and blanket life
- Economical wash

DIRECTIONS

BLANKETS:

Apply **UNI WEB PLUS** with a water-dampened rag or sponge. Wipe dry. Can be diluted with water.

ROLLERS:

Use as is or mixed with water as a daily wash.
