

# PRODUCT PROFILE

## UNI FRONT PAGE 162

### Water-miscible wash for automated wash-up systems

**UNI FRONT PAGE 162** is a water-miscible wash specifically formulated for presses equipped with automated wash-up systems. It has been designed to clean the most current rollers made either of rubber or synthetic ingredients without harming the plate.

**UNI FRONT PAGE 162** is a one-step wash that removes dried ink, gum dirt and lint. It penetrates the glaze left by the different products and deep cleans, quickly evaporating without leaving any kind of residue but rather a smooth, ink receptive surface.

### **DIRECTIONS**

#### **BLANKETS:**

Can be used as is or applied on a wet wash-up rag to remove water soluble or solvent soluble glaze as well as blanket piling and lint at the same time.

#### **ROLLERS:**

Use at full strength with any automated wash-up attachment or apply manually with a wash-up bottle. **UNI FRONT PAGE 162** can be diluted with water up to 25% in a wash-up bottle.

Safety data sheet available upon request
