

PRODUCT PROFILE

UNI KOLITHO

Fountain solution concentrate for polyester, paper photo-direct and metal plate!

UNI KOLITHO has proven performance on polyester and paper photo-direct plates, on all types of metal offset plates (except electrostatic). Will perform exceptionally well on all rubber base and oil base inks.

Runs equally well on a wide variety of dampening systems as conventional, integrate, Kompac and Cresline. Its balanced formulation keeps non-image areas highly hydrophilic, while image areas remain highly ink receptive.

ADVANTAGES

- Effective with all types of inks
- Compatible with all plates
- No pH or conductivity concern
- Glycerin based

DIRECTIONS

Presensitized and additive metal plates, camera and photo-direct plates:
From 6 up to 16 parts water to 1 part **UNI KOLITHO**.

Paper masters, direct image and diffusion transfer plates:
From 6 to 24 parts water to 1 part **UNI KOLITHO**.

Safety data sheet available upon request
