

# PRODUCT PROFILE

## UNI DEGLAZER PLUS

### Unique roller & blanket deglazer/conditioner

**UNI DEGLAZER PLUS** is formulated to remove glaze from rollers and blankets caused by ink and especially paper by-products resulting from calcium in alkaline paper, leaving rollers and blankets velvety smooth.

**UNI DEGLAZER PLUS** should be used on a weekly basis to help keep rollers and blankets in optimal condition. **UNI DEGLAZER PLUS** is mild enough to use after every wash-up to prevent build-up of glaze caused by ink and especially paper by-products such as calcium carbonate.

#### ADVANTAGES

- Environmental roller and blanket deglazer/conditioner
- Can greatly extend roller and blanket life when used regularly
- Reduces print quality problems related to calcium contamination from paper including ink stripping and colour variation
- Excellent for doing a colour change
- Will not swell rollers or blankets
- High flash point
- Low V.O.C.'s

#### DIRECTIONS

##### BLANKETS:

Remove wet ink by washing up with your regular **Unigraph** press wash. Apply **UNI DEGLAZER PLUS** on a rag and wipe onto blanket. Leave product on the blanket for a couple of minutes and then finish up by rinsing with your regular Unigraph press wash.

##### ROLLERS:

Remove wet ink by washing up with your regular **Unigraph** press wash. Apply **UNI DEGLAZER PLUS** sparingly but continuously until no trace of ink appears on the wash-up blade. Finish up by rinsing with your regular **Unigraph** press wash.
