

PRODUCT PROFILE

UNI 313

Concentrated anti-foam agent

UNI 313 is a powerful super concentrated anti-foam agent for fountain solution recirculators. Foaming occurs when circulation system has too much agitation or is pulling in too much air.

By using **UNI 313**, it will help get rid of foam often caused by the presence of paper coating and other contaminants of the printing process.

ADVANTAGES

- Immediate defoaming action
- Long term foam prevention
- Good stability

DIRECTIONS

Add ½ to 1 capful of **UNI 313** for each 5 gallons in system.

Safety data sheet available upon request
