

PRODUCT PROFILE

UNI 314

**is a powerful anti-foam agent for fountain
solution recirculators**

Foaming occurs when circulation system has too much agitation or is pulling in too much air. By using **UNI 314**, it will help get rid of foam often caused by the presence of paper coating and other contaminants of the printing process.

ADVANTAGES

- Immediate defoaming action
- Long-term foam prevention
- Good stability

DIRECTIONS

Add 1 to 2 capfuls of **UNI 314** for each 5 gallons in system.
