

PRODUCT PROFILE

UNI Q.D. WASH

Water miscible wash for automated wash-up systems

UNI Q.D. WASH is a water-miscible wash specifically formulated for presses equipped with automated wash-up systems. It has been designed with a higher evaporation rate to clean the most current rollers made either of rubber or synthetic ingredients without harming the covering of the plates.

UNI Q.D. WASH is a one-step wash that removes dried ink, gum, dirt and lint. It penetrates the glaze left by the different products and keep-cleans, quickly evaporating without leaving any kind of residue but rather a smooth, ink-receptive surface.

DIRECTIONS

BLANKETS:

Can be used as is or applied on a wet wash-up rag to remove water soluble or solvent soluble glaze as well as blanket piling and lint at the same time.

ROLLERS:

Use at full strength with any automated wash-up attachment or apply manually with a wash-up bottle. **UNI Q.D. WASH** can be diluted with water up to 50% in a wash-up bottle.
