

PRODUCT PROFILE

UNI POWER FLUSH

Superior cleaner for maintaining dampening systems

UNI POWER FLUSH works quickly to remove scum, ink slime and paper debris from dampening fountain pans, feed lines and circulators. Regular use in a dampening system maintenance program will prevent the build-up of slime, residues and other contaminants.

ADVANTAGES

- Quickly and completely removes scum, slime, ink and paper debris
- Prevents build-up of slime and residues in lines and pumps
- Regular use will help avoid costly downtime

DIRECTIONS

Drain the entire press dampening system. Remove filters. Fill with fresh hot water and dilute **UNI POWER FLUSH**, 1 part in 20 parts of hot water, and circulate for 15 to 30 minutes. Flush circulating system thoroughly with water. For tough jobs, dilute 1 part of **UNI POWER FLUSH** in 10 parts of hot water and circulate for 30 to 60 minutes.
