

PRODUCT PROFILE

UNI LITHOFOUNT 2030

Fountain solution concentrate for heatset web presses

UNI LITHOFOUNT 2030 is a one-step fountain solution concentrate, formulated with a non-piling additive to give longer intervals between blanket washes on heatset web presses. Phosphate and chrome free, **UNI LITHOFOUNT 2030** is formulated for all water conditions and is designed for all continuous dampening systems.

ADVANTAGES

- It is formulated with an additive which eliminates the accumulation of calcium in the fountain solution
- Contains a non-piling additive which efficiently reduces piling on the blanket and extends blanket washing intervals
- Allows you to print with less water, giving you cleaner, sharper printing
- Significantly reduces ink consumption
- Has a pH range between 4 and 4.5
- Very efficient in eliminating "dot blow out"
- Cleaner faster start-ups
- Improves plate desensitizing

DIRECTIONS

For conventional dampening systems:

Mix 3 to 6 ounces of **UNI LITHOFOUNT 2030** per gallon of water (128 oz).

For alcohol type dampening systems:

Mix 5 to 7 ounces of **UNI LITHOFOUNT 2030** per gallon of water (128 oz).
